

3 Day Certification Course on Paint Coating Inspection & Quality Control

SCOPE

With thousands of paint formulations, available from various manufacturers, and a lots of new sophisticated Techniques of paints application and surface preparation, paint coating has become a science and art, and every

Person, whether he is a user, supervisor, applicator, supplier or manufacturer needs a proper knowledge in order to get maximum life out of a particular paint formation. Further, paint testing has become necessary both at the pre-qualification stage, during the application and even after the paint has been applied for periodic assessment of its life. Since a large number of paint suppliers, users, supervisors do not have a formal education on paint coatings, education and training through these courses has become necessary to take best out of paint coating.

What information you require? Theoretical Knowledge

Level 1 Course

- Fundamental knowledge of Corrosion
- Basic of paint coatings and chemistry of various
- kinds of paints, resins, and formulations, their relation to corrosion protection.
- Conventional and advanced coating systems.
- Surface preparation methods with latest standards and specification.
- Paint Application techniques and best application practice mantras.
- Reasons for Paint Failure and its Mechanism.
- Paint repair and rehabilitation – maintenance Coatings.
- How to write paint specifications?
- Safety aspects in paint coating application.

COURSE DATES

22 to 24 August, 2024 (Level -1)
